Sorbonne Université

Laboratoire de Physique Théorique et Hautes Energies

Institut Universitaire de France

December 2, 2023

List of papers

On the Kac-Rice formula & landscapes

L. I. Nicolaescu, *Counting Zeros of Random Functions*, American Mathematical Monthly **130**, 625 (2023).

M. Notarnicola, *How many zeros has a random polynomial?*, Bachelor thesis, Université du Luxembourg, 2015 (available online).

Y. V. Fyodorov and I. Williams, *Replica symmetry breaking condition exposed by random matrix calculation of landscape complexity*, J. Stat. Phys. **129**, 1081 (2007).

P. Le Doussal and C. Monthus, *Exact solutions for the statistics of extrema of some random 1D landscapes, application to the equilibrium and the dynamics of the toy model*, Physica A **317**, 140 (2003).

V. Ros and Y. V. Fyodorov, *The high-d landscapes paradigm: spin-glasses, and beyond*, arXiv:2209.07975

The random energy model

B. Derrida, *Random Energy Model: Limit of a Family of Disordered Models*, Phys. Rev. Lett. **45**, 79 (1980).

B. Derrida, *Random-energy model: An exactly solvable model of disordered systems*, Phys. Rev. B **24**, 2613 (1981).

B. Derrida, V. Gayrard, and P. Mottishaw, *Random energy models: broken replica symmetry and activated dynamics*, in *Spin Glass Theory and Far Beyond: Replica Symmetry Breaking after 40 Years*, P. Charbonneau, E. Marinari, G. Parisi, F. Ricci-Tersenghi, G. Sicuro, F. Zamponi, and M. Mézard, (World Scientific 2023).

The spherical Sherrington-Kirkpatrick model

J. M. Kosterlitz, D. J. Thouless, and R. C. Jones. *Spherical Model of a Spin-Glass*, Phys. Rev. Lett. **36**, 1217 (1976).

L. F. Cugliandolo and D. S. Dean, *Full dynamical solution for a spherical spin-glass model*, J. Phys. A: Math. Gen. **28**, 4213 (1995).

Econophysics applications

J. Granier-Brun, M. Benzaquen, S. Ciliberti and J.-P. Bouchaud, *A new spin on optimal portfolios and ecological equilibria*, J. Stat. Mech. **2021** 093408 (2021).

J.-P. Bouchaud, M. Marsili, and J.-P. Nadal, *Application of spin glass ideas in social sciences, economics and finance*, in *Spin Glass Theory & Far Beyond 40 years of Replica Symmetry Breaking*, P. Charbonneau et al eds. (2023).

Theoretical ecology applications

Y. V. Fyodorov, B. A. Khoruzhenko, *Nonlinear analogue of the May-Wigner instability transition*, Proc. Natl. Acad. Sci. U.S.A. **113**, 6827 (2016).

G. Ben Arous, Y. V. Fyodorov and B. A. Khoruzhenko, *Counting equilibria of large complex systems by instability index*, Proc. Natl. Acad. Sci. U.S.A. **118**, e2023719118 (2021).

A. Altieri, *Glassy features and complex dynamics in ecological systems*, in *Spin Glass Theory & Far Beyond 40 years of Replica Symmetry Breaking*, P. Charbonneau et al eds. (2023).

Neural networks

D. J. Amit, H. Gutfreund and H. Sompolinsky, *Spin-glass models of neural networks*, Phys. Rev. A **32**, 1007 (1985).

D. J. Amit, H. Gutfreund and H. Sompolinsky, *Statistical mechanics of neural networks near saturation*, Annals of Physics **173**, 30 (1987).

M. Gabri  , S. Ganguli, C. Lucibello, and R. Zecchina, *Neural networks: from the perceptron to deep nets* in *Spin Glass Theory & Far Beyond 40 years of Replica Symmetry Breaking*, P. Charbonneau et al eds. (2023).

Active Matter & quenched disorder

S. Jose, A. Rosso, and K. Ramola, *Generalized disorder averages and current fluctuations in run and tumble particles*, arXiv:2306.13613

G. Lin, Z. Han, A. Shee, and C. Huepe, *Noise-induced quenched disorder in dense active systems* arXiv:2304.03630

F. J. Moore, J. Russo, T. B. Liverpool, C. P. Royall, *Active Brownian Particles in Random and Porous Environments*, arXiv:2303.17022

D. Vahabli, T. Vicsek, *Emergence of synchronised rotations in dense active matter with disorder*, arXiv:2302.09439

Yu Duan, B. Mahault, Y. Ma, X. Shi, H. Chat  , *Breakdown of Ergodicity and Self-Averaging in Polar Flocks with Quenched Disorder*, Phys. Rev. Lett. **126**, 178001 (2021).

A particle in a quenched random potential

A. Engel, *Replica symmetry breaking in zero dimension*, Nucl. Phys. B **410** [FS], 617 (1993).

Y. V. Fyodorov, *On statistical mechanics of a single particle in high-dimensional random landscapes*, Acta Physica Polonica B **38**, 4055 (2007).

Generic finite dimensional disordered systems

S. Chatterjee, *Features of a spin glass in the random field Ising model*, arXiv:2307.07634

Methods

A. Braunstein, G. Semerjian *The cavity method: from exact solutions to algorithms*, in *Spin Glass Theory & Far Beyond 40 years of Replica Symmetry Breaking*, P. Charbonneau et al eds. (2023).

S. Caracciolo, A. K. Hartmann, S. Kirkpatrick, and M. Weigel, *Simulated Annealing, Optimization, Searching for Ground States*, in *Spin Glass Theory & Far Beyond 40 years of Replica Symmetry Breaking*, P. Charbonneau et al eds. (2023).
